The Nickolay Dodov Snow Sports Safety Foundation

501c3 charitable corporation 46-3764229

In 2012 Nicolay Dodov and his guide were killed in a tragic avalanche while filming a Helicopter assisted Snowboarding movie in Haines, Alaska. This event triggered national attention to this activity, its inherent dangers, and elements of personal safety that could prevent future tragedies. Nicolay's parents, and the community of Bear Valley, CA where he grew up, have created the Nickolay Dodov Snow Sports Safety Foundation in his memory.

Our mission: To promote snow sports safety and awareness through educational programs and events. To encourage children and enthusiasts of all ages to safely explore the beauty of the mountains and to inspire a healthy and positive lifestyle in the light of Nickolay Dodov .

The Nickolay Dodov Foundation will help educate those who will in turn mentor, inspire, and educate young participants about the inherent risks involved and promote greater safety awareness while doing snow sport related activities. We are providing scholarships to those interested in supporting this mission by obtaining the necessary education or certifications. Our focus is to provide access to programs, camps and seminars for coaches and youth leaders, so that they, in turn, can spread the safety message of our foundation.
